Experience

Software Engineer | Synamedia

Oct, 2023 - Present

- Built accessible, responsive navigation across web/mobile platforms, enhancing usability.
- Cut app load time by 60%, boosting engagement and retention.
- Integrated payment gateway for seamless checkout and content purchases.
- Led development of high-performance video playback modules for cross-platform streaming.
- Connected React app to internal analytics dashboard, improving playback insights and user flow.
- Collaborated on scalable, reusable components using React and MVC principles.
- Applied Agile and OOP practices for rapid, maintainable development cycles.

Associate Software Engineer | Synamedia

Nov, 2022 - Sept, 2023

- Enabled PWA support, increasing cross-device usage by 43%.
- Refactored legacy code using SOLID principles, enhancing maintainability and scalability.
- Wrote Cypress test suites for unit/integration testing, reducing regressions and bugs.

Frontend Engineer | Alter.game

Aug, 2021 - Aug, 2022

- Delivered a chat app in React Native, supporting ~10K daily active users.
- Boosted site performance via Lighthouse audits, leading to an 80% rise in downloads.
- Integrated Three.js for immersive 3D rendering and uploads.
- Led full-stack development of a 3D marketplace using Next.js and modular architecture.

Projects

Markdown Canvas

Link: markdowncanvas.netlify.app

- A lightweight Markdown previewer built with TypeScript and React, deployed via GitHub Actions + Netlify. Powered by my custom-built NPM package markdown-parser (300+ downloads), the app demonstrates strong modular design, real-time rendering.

Ideal Editor

Link: ideal-editor.netlify.app

- A fast, distraction-free web-based text editor with cloud sync, built using custom LinkedList-based storage algorithms for efficient state handling. Applied MVC architecture and clean design patterns like command pattern to implement command execution and scalable Redux based state management.

AlgoArena

Link: algoarena.netlify.app

- A fun, interactive tool to visualize shortest path algorithms like Dijkstra's, built from scratch using TypeScript and React. Implements modular, scalable architecture with plans to support advanced algorithms like A*.

Achievements

- Launched Student Academic Record management database in College Symposium.
- Highest rating of 1571 on CodeChef, Ranked Top 25% Globally on Leetcode & solved over 1000+ problems

Technical Skills

- Languages: JavaScript, TypeScript, C++, Python
- Frameworks: React, Redux, React Native, Next.js, Nodejs, TailwindCSS, Jest, Cypress, GraphQL

Education

University college of Engineering, Kanchipuram

Bachelor of engineering in Computer science and engineering (8.1 CGPA)

July, 2022

Kanchipuram, India
