Experience

Software Engineer | Synamedia

Jan 2024 - Present

- Played an important role in player implementation for the beIN Web application (React), ensuring a high-quality, seamless global user experience.
- Achieved a 50% reduction in app bootstrap time (5s to 2.5s) by optimizing API calls and frontend rendering with advanced caching and React techniques.
- Introduced the use of Local LLMs (Ollama) for Clarissa log analysis, significantly improving data validation and generating actionable insights for product enhancements; currently leading LLM integration for ATP automation.
- Currently boosting testing efficiency and coverage by leading the integration of LLMs to automate Prewritten Automated Test Procedures (ATP), fostering a more bug-free development cycle.

Associate Software Engineer | Synamedia

Nov 2022 - Dec 2023

- Secured a full product development contract by rapidly delivering a high-impact AMT demo within one week, demonstrating exceptional commitment and frontend skills.
- Dramatically improved web application stability by resolving over 50 critical bugs, ensuring production readiness.
- Enhanced user experience by leading UI/UX revamp, delivering full Guide flow (recording, favourites) in a month.
- Earned promotion in under a year for outstanding performance, rapid skill development in frontend (JavaScript) technologies, and significant project contributions.

Associate | Alter. Game

Aug 2021 - Oct 2022

- Led the ground-up development of an innovative 3D NFT marketplace using Next.js, TypeScript, and ThreeJS, establishing a new company product line.
- Boosted React app downloads by 80% for company site by leading Lighthouse-based performance optimizations.
- Doubled hiring ratio (100% increase) by developing and launching a dedicated recruiting platform built with React.
- Successfully launched and maintained a React Native chat application, reliably serving ~10,000 daily active users.

Projects

Markdown Canvas

Link: markdown.gokulcodes.dev

- Built a lightweight, modular Markdown-to-HTML parser from scratch using recursive backtracking and a custom regex engine. (Tech: Next.js, Vercel, Custom Parser Logic)

Lattize

Link: github.com/gokulcodes/lattize

- Developed a comprehensive Chrome DevTools extension for in-depth website performance metrics (Core Web Vitals, FPS), DOM/CSSOM insights, and network analysis. (Tech: ReactJS, CRXJS, Vite, Chrome APIs)

Ideal Editor

Link: ideal.gokulcodes.dev

- Created a minimal, fast, web-based text editor with cloud/local storage, built with custom N-Array Tree and LinkedList data structures. (Tech: Next.js, Vercel, TypeScript, Custom Data Structures)

Gamuts

Link: gamuts.gokulcodes.dev

- Developed an intuitive web-based diagramming tool with a hand-drawn feel, infinite canvas, and rich editing capabilities. (Tech: ReactJS, Vite, TypeScript, Canvas API, Konva.js)

Algo Arena

Link: algoarena.netlify.app

- A fun, interactive tool to visualize shortest path algorithms like Dijkstra's, built from scratch using TypeScript and React. Implements modular, scalable architecture with plans to support advanced algorithms like A*.

Achievements

- India Site Excellence Award, Synamedia (May 2025)
- Featured in company-wide newsletter for teamwork and technical excellence (Nov 2024)
- Launched Student Academic Record management database in College Symposium.
- Highest rating of 1571 on CodeChef, Ranked Top 25% Globally on Leetcode & solved over 2000+ problems

Education

University college of Engineering, Kanchipuram

July 2022

Bachelor of engineering in Computer science and engineering (8.1 CGPA) Kanchipuram, India
